

## THE METROHEALTH BRECKSVILLE HEALTH & SURGERY CENTER METROHEALTH SYSTEM

The \$38 million, 70,000 square foot MetroHealth Brecksville Health and Surgery Center serves as a critical component to executing MetroHealth's strategy to bring patient care directly into the communities they serve. The two-story, free-standing medical and surgical outpatient center houses a 24-hour emergency room with a helipad for Life Flight operations, medical offices which include primary and specialty care (cardiology, dermatology, gastroenterology, neurology, OB-GYN, ophthalmology, and orthopedics), pathology and radiology services, pharmacy and infusion services. The surgery center features three state-of-the-art operating suites.

Signet worked hand-in-hand with MetroHealth on all aspects of project programming, budgeting, development and delivery. In addition to providing project management services, Signet was responsible for project financing and owns the building for MetroHealth's operations.
